Report on Inspection of Front Office at Jyske Bank A/S

In May 2026, the Danish Financial Supervisory Authority conducted an inspection of Front Office at Jyske Bank.

Front Office refers to departments that have direct contact with customers or markets, for example in connection with trading and advisory services.

The inspection focused on the Bank's risk management and strategy for the Front Office area, based on the Bank's activities within its trading portfolio.

The Bank reports derivative transactions in accordance with EMIR and performs semi-annual checks of the quality of its reporting. The frequency of data quality controls is low and may possibly result in significant deficiencies in the quality of regulatory reporting not being identified in a timely manner.

The inspection did not give rise to any supervisory measures or changes to the Bank's individual solvency requirement.
